Dear Resident,

J. Fletcher Creamer and Son, Inc. has been contracted by Gloucester County to perform a stormwater culvert replacement on Ogden Station Road (CR 648) approximately 1,000 feet south of Kings Highway (CR 551). This culvert replacement will require a road closure for approximately 30 days. This road closure is set to occur on Wednesday, July 5, 2017. Message boards giving notice of this closure will be in place by Wednesday, June 28, 2017. A detour will be posted prior to the closure and will remain in place until the culvert is completed.

The project also includes the slip lining of a storm pipe on Parkville Station Road near the Turnpike Overpass. This work will not be done at the same time as the road closure for Ogden Station Road since Parkville is part of the detour. This work will be done utilizing alternating traffic (one lane closed at a time) and the road will be fully operational at the end of each day.

If you have questions or would like additional information, please call 201-488-9800.

Sincerely,
J. FLETCHER CREAMER & SON, INC.

Dan Fowler, PE
Project Manager
